$$C = (O_{\text{open}} + O_{\text{closed}}) - (E_{\text{open}} + E_{\text{closed}})$$

coordination magnitude $(= 2\,\text{Cov})$*, marginal-free*

$$F = \frac{O_{\text{open}}}{O_{\text{open}} + O_{\text{closed}}}$$

realized direction of the concordant mass

$$D = C \cdot (2F - 1)$$

directional coordination: *co-closed* $(-)$ $\rightarrow$ *mixed* (0) $\rightarrow$ *co-open* $(+)$
